

#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

Evidence of Evolution

Background
When Charles Darwin first proposed the idea that all new species descended from an ancestor, he performed an exhaustive amount of research to provide as much evidence as possible. Today, the major pieces of evidence for this theory can be broken down into the fossil record, embryology, comparative anatomy, and molecular biology.

Fossils
This is a series of skulls and front leg bones of organisms believed to be ancestors of the modern day horse.

Equus (modern horse)	Palaeotherium	Miohippus	Mesohippus	Eohippus (three-toed)

Source: <http://www.ck12.org>

1. Give two similarities between each of the skulls that might lead to the conclusion that these are all related species.
