Directions: read the following passages and determine the text structure. Then, put information from the text into the appropriate graphic organizer. Remember to focus on the main idea of each paragraph.

1. Most people have had red pizza, or pizza covered with red sauce, but have you ever had white pizza? White pizza is made in almost the same way as red pizza: the dough rises and is rolled out, toppings are applied, and it is cooked in an oven—but the big difference is that white pizza does not have any tomato sauce on it. Instead, a white pizza may have olive oil or no sauce at all. I like white pizza more than red pizza because you can really taste the ingredients. Adding some fresh tomatoes to a white pizza will give it that tomato flavor without the completely overwhelming taste of the red sauce that covers most pizzas. If you have not had a white pizza, I recommend that you order or make one today.

2. The foundation of every pizza is the crust, and good crust comes from good dough. You might be surprised to learn that pizza dough is made from nothing more than flour, water, yeast, olive oil, salt, and sometimes sugar. Start by adding your yeast packet to a cup of warm water. Let the yeast activate, and then add two cups of flour, two tablespoons of olive oil, two teaspoons of sugar, and a teaspoon of salt. Mix all of that together and wait half an hour for the dough to rise. Now you're ready to roll it out!
